COVID-19 UPDATE

Motion Industries' Committed Response

Motion Industries is committed to ensure our distribution and shop operations continue to support our customers 24/7. This commitment extends to and includes such unprecedented times as everyone is now facing. Our products and services support the needs of manufacturers, municipalities, and other entities which, in turn, provide residents their day-to-day needs.

As an “essential business,” Motion Industries takes this responsibility seriously, reflecting the President of the United States’ COVID-19 Guidelines for America – we follow CDC guidelines to protect our employees while supporting industry. This especially includes “critical infrastructure sectors” including:

- Food and Agriculture
- Healthcare and Public Health
- Critical Manufacturing
- Energy
- Water/Wastewater

In addition, we support other crucial industries including equipment, primary metals, pulp and paper, automotive/transportation, and others – all of these industries need each other to succeed in production and to provide daily necessities.

Motion Industries distributes many of the critical products – including bearings, power transmission, electrical and automation, hydraulics and pneumatics, hydraulic and industrial hose, process pumps, seals and accessories, linear, industrial and safety supplies, and material handling – necessary for industry production and operations. Our wide North American network provides these products and services as quickly as possible -- especially in emergency situations.

As the COVID-19 situation evolves, we are continually evaluating our operations in consideration of our customers’ current needs while keeping employee well-being in check. We remain focused and vigilant to ensure our customers have what they need to continue their own critical operations as smoothly as possible.

We continue to be your partner in industry, and our business is supporting you. Please call us at 800-526-9328 with any questions.

Regards,

Randy Breaux
President
Motion Industries
