RE: Tom Gallagher - Automotive Hall of Fame Honoree

We are very pleased to announce Tom Gallagher will be inducted into the Automotive Hall of Fame in Detroit, Michigan, at the MGM Grand Hotel on July 23, 2020. Attached is the official press release, for your review.

Since 1939, the Automotive Hall of Fame has honored noteworthy individuals who have created, shaped and changed the automotive and mobility market, and we can think of no better candidate for this honor.

Tom joins former GPC CEOs, Carlyle Fraser and Wilton Looney, in accepting what is considered to be the greatest honor in the automotive industry. Mr. Looney was inducted in 1992, and Mr. Fraser in 1981.

Please join me in congratulating Tom on this momentous career achievement!

Sincerely,

Paul Donahue
DEARBORN, Mich., Feb. 6, 2020 /PRNewswire/ -- The Automotive Hall of Fame will induct four new members this year and announce the inaugural Mobility Innovator Award at the 2020 Induction & Awards Ceremony in Detroit, Mich., at the MGM Grand Hotel on July 23.

The 2020 Awardees

The Automotive Hall of Fame’s 2020 Inductees include: Mong-Koo Chung, Chairman and CEO of Hyundai Motor Company; Thomas Gallagher, former CEO of Genuine Parts Company; Jay Leno, automotive heritage leadership through his Jay Leno's Garage series on CNBC; and Helene Rother, one of the first women in automotive interior design for General Motors, Nash Motors, and others.

"Since 1939, the Automotive Hall of Fame has honored individuals who have significantly benefited the automotive industry and the world of mobility. We are excited to announce our 2020 Inductee Class," said Ramzi Hermiz, Chairman of the Automotive Hall of Fame and President and CEO of Shiloh Industries. "We believe that these four individuals are incredibly worthy of this honor thanks to their outstanding achievements and innovations."

Induction into the Automotive Hall of Fame is reserved for noteworthy individuals who created, shaped, and changed the automotive and mobility market. It is considered the single greatest honor in the automotive industry.

2020 Automotive Hall of Fame Inductees

Mong-Koo Chung – Chairman Mong-Koo Chung is the leader credited with the success of Hyundai Motor Group. Through Chung's leadership, Hyundai Motor became Korea's largest automaker and Hyundai Motor Group is now the world's fifth largest automotive company. Chung is noted for many remarkable accomplishments, including: acquiring Kia Motors; spearheading growth with new plants in key regions, including United States, Europe, China, India, Brazil and Russia; and creating a highly efficient vertically integrated business structure that produces everything from steel to vehicles. Chung's legacy mirrors other legends of the industry who have launched and guided an automotive firm to global growth and distinction.
**Thomas Gallagher** – Thomas Gallagher is the visionary leader who led Genuine Parts Company (GPC) as President or CEO for more than 25 years, guiding the organization through a period of robust growth and long-term value creation for the company's customers, independent stores and repair shops, suppliers, and stakeholders. Gallagher served GPC as a relentless innovator who initiated and expanded programs to increase the competitiveness of independent, locally-owned parts stores, train and enhance the image of automotive technicians, and advance the interests of millions of auto owners.

**Jay Leno** – Jay Leno is the passion behind every automotive enthusiast. On his CNBC primetime series "Jay Leno's Garage," Jay takes fast and furious car fans for a high-octane spin across the country with a mix of stunts, reviews, celebrity interviews and challenges. There's no wheel Jay won't get behind to tell the story of our love affair with the automobile. The CNBC show is an outgrowth of the Emmy Award winning "Jay Leno's Garage" digital series. Leno has dedicated a lifetime to sharing the stories of all things automotive from classic cars to supercars and everything in-between. He has showcased technology, innovation and the colorful history of the automobile inspiring viewers to enjoy automobiles, from the most prosaic to the most exotic. There's something in every machine that draws his interest, he knows the stories of the people who built them as well. Leno truly is America's automotive ambassador. The legendary comedian and acclaimed late night TV host is also an Emmy Award winner for "The Tonight Show with Jay Leno," which was rated number one for over two straight decades.

**Helene Rother** – Helene Rother became one of the first female automotive designers when she joined the interior styling staff of General Motors in Detroit in 1942. Helene achieved a successful career in automotive design at a time when- as one author put it – the glass ceiling couldn't be seen through the iron door that covered it. In 1947, she established her own design studio and was soon selected by Nash-Kelvinator as their interior automotive designer. Helene Rother helped shift the standard of automotive design, post WWII, from basic and simple to elegant and unique. This focus on design and quality features helped establish a new segment in the automobile market with her work on the Nash Rambler from 1948-1956. Rother's accomplishments and natural talent for industrial design mirror the stories of the pioneers and are reflected in the existing list of Inductees in the category of Inventors, Engineers, and Designers.

The Automotive Hall of Fame is proud to introduce the Mobility Innovator Award.

"This award recognizes the outstanding work an individual has accomplished to introduce the new technologies and services that are redefining mobility," said Automotive Hall of Fame President Sarah Cook.

The 2020 Mobility Innovator awardee is **Harold Goddijn**, CEO of TomTom and a member of its Management Board. He is an entrepreneur and innovator who co-founded TomTom in 1991, having previously founded Psion Netherlands BV in 1989 as a joint venture with Psion Plc. TomTom created the easy-to-use navigation device, one of the most influential inventions of all time. Since then, Harold Goddijn has grown the company from a start-up into a leading global location technology specialist that shapes mobility and an autonomous future with navigation software, real-time maps, traffic and services. As a result of Harold's vision and leadership, the business today benefits a billion users from a multitude of innovative navigation tools.
