

Problem

- PVC Bands last only one to three months and take at least an hour to replace
- PVC Bands stretch, requiring weekly inspection and re-tension
- PVC joining method of duct tape results in product loss due to quality concerns

Solution

- Eagle Taper Edge Band lasts up to 12 times longer than PVC bands. Time spent on replacements is dramatically reduced.
- Negligible band stretch for the same perfect wallboard impression day after day, month after month.
- No stretch also means “fit and forget” installation. No need to spend time retensioning.
- Thermal splicing for tough, flexible joint

Calculated Cost Savings

Added Value of Eagle Taper Edge Band Belt	Current Belt	Eagle Taper Edge Band Belt
Cost of bands	\$3,600	\$2,350
Labor hours to change belts	54	4.5
Labor hours to re-tension	96	0
Band maintenance labor costs @\$40/hr	\$6,000	\$180
Annual cost related to bands per line	\$9,600	\$2,530
Annual cost savings per production line by changing to Eagle TEB:		\$7,070

Annual Cost Savings

\$ 7,070

- **12+ month life span**
- **Consistent board impressions**
- **High heat resistance = no cracks**
- **Fit & forget installation**
