

ROOFING SOLUTIONS FOR REVERE ROOFING

WITH POWERBLANKET

UNLIKE CONVENTIONAL INSULATED BLANKETS AND BAND HEATERS, POWERBLANKET HAS DEVELOPED THE BEST HEAT DISTRIBUTION SOLUTIONS TO HEAT BUCKETS AND PAILS EVENLY AND CONSISTENTLY.

SUMMARY

Cold. It can shut down projects, ruin product and lead to costly delays. This is most apparent in the roofing industry, where dropping temperatures solidify spray adhesive and create a backlog of unfinished projects while waiting for the weather to improve.

Ohio-based Revere Roofing, a licensed roofing contractor with a proven track record of quality work in commercial roofing, has been in this situation time and time again. Winter pushes through its March expiration date, enduring well into Spring. In April of 2019, Revere

In April 2019 we started using more spray adhesive for single ply membranes. It's a 40 pound cylinder. Most people will be going that direction because of huge time savings, but it is temperature sensitive. Using Powerblankets keeps it at the necessary temperatures.

ISAAC WHITE, PRESIDENT

Roofing employees were eager to try out a new spray adhesive for single-ply membranes, allowing jobs to be finished faster. However, the weather was still too chilly to try out the spray adhesive, which needs to be kept at or above 70° F. The company began searching for heating options so they could power through the cold.

THE POWERBLANKET SOLUTION

Revere Roofing discovered Powerblanket's bucket heaters.

"We started looking around and Powerblanket came up," said Isaac White, President of Revere Roofing. "We had talked with a distributor and they had mentioned it. We bought several through a distributor."

POWERBLANKET PROVIDES THE MOST INNOVATIVE HEATING SOLUTIONS ON THE MARKET, PROVIDING UNIFORM SAFE HEAT.

White said his company became an immediate fan of the bucket heaters.

“The guys like them,” he said, “and they’re easy to use. Nothing complicated about them. We strap the heater on the pail and can still move the pail all over the job with the heat source strapped to it. This is very convenient.” The convenience of mobile heat saved Revere Roofing massive amounts of time--and time is money.

DOUBLE-TIME

White said that Powerblanket’s pail heaters allow his workers to move at double the speed they were moving in cold weather before.

“It’s pretty ideal,” he said. “The adhesive comes in a 5 gallon pail, then you have to mix it and roll it. The guys are able to put it up twice as fast.”

Powerblanket serves the roofing industry’s weather-sensitive needs. Whether it’s heating or cooling, Powerblanket ensures temperatures stay exactly where you want them to be.
